SERVICES

Web platforms

Business apps, client portals, back-offices, dashboards.

Mobile apps

Android and iOS from a single codebase, connected to your API.

APIs & real time

REST backends, auctions and live updates, third-party integrations.

SKILLS

Backend

Node.js / Express, Laravel, REST APIs, Socket.io, Java

Frontend & Mobile

Next.js, React, Flutter, React Native, TypeScript, JavaFX

Data

PostgreSQL, MySQL, Prisma, Eloquent ORM, UML modeling

Tools

Git / GitHub, Docker, Firebase, Render, Figma

EDUCATION

Bachelor's degree in Web Application Development and Administration (D2A)

UFR SATIC — Alioune Diop University of Bambey (UADB), Senegal

PROFILE

Freelance full-stack developer based in Senegal. I design and build **web platforms**, **mobile apps** and **real-time backends**, from mockup to production. I'm used to working in a team on a shared repository with shared conventions, and I deliver documented code your team can take over.

PROJECTS

NDAANAAN Institut

Client project · in development

Online Islamic education platform (Quran, Fiqh, Arabic): student/teacher mobile app, director's back-office and API.

My role: The entire student side of the mobile app (sign-up, courses, video calls, notifications, profile) and the teaching section of the back-office.

FlutterRiverpodLaravel 12Next.jsFirebase

Built with Alpha Oumar Diallo

Douane Enchères SN

In production · Render

Online auction platform for vehicles seized by customs, with real-time bidding for buyers at the Port of Dakar.

My role: Real-time auction backend (Socket.io) and a companion mobile app for buyers.

Next.jsTypeScriptPostgreSQLPrismaSocket.ioReact Native

Built with Alpha Oumar Diallo

Natt-Bi (Tontine App)

Management app for tontines (rotating savings groups): contribution cycles, members and payout tracking.

My role: Tontine data model (members, cycles, contributions) and the cycle management screens.

Laravel 11PostgreSQLEloquentBlade

Built with Alpha Oumar Diallo, Sira, El Hadj

buntu-liggeey

Desktop job-matching app, built for young people without a professional network.

My role: Domain model design (UML) and the entire data access layer.

Java 21JavaFXJDBCMySQL

HOW I WORK

01 Discovery	02 Quote	03 Sprints	04 Delivery
A call to understand the needs and constraints.	Scope, milestones and deadlines, in writing.	A demo at every stage, on a test environment.	Go-live, with source code and documentation handed over.
